You can also make a light weight Jacket by using 54" wide Home Dec fabric for the exterior.

This Coat was designed as a fitted garment so light weight clothing can be worn underneath. Make the next larger size for heavier layers.

To get started, check the charts below to determine which size and length coat you'll be making.

Use the Body Measurement Chart to determine the size you'll be making. First take a measuring tape and measure around the fullest part of the child's chest, waist and hips. Their chest measurement will dictate their size. If their measurements fall between sizes, choose the larger of the two sizes.

BODY MEASUREMENT CHART:

GIRL'S SIZES:	CHEST:	WAIST:	HIPS:	WAIST LENGTH:	BICEP:
Toddler (3)	22"	20 1/2"	22 1/2"	10"	6 1/2"
